

SSB RADIO TELEPHONE

IC-M700PRO

Long distance communication made simple.

Simplified operation

The IC-M700PRO is easy to use whether you are new to SSB or an expert. Channel selection is guick and easy to access with large, independent GROUP and CHANNEL knobs. Each panel button has only 1 function. The large, easy to read display shows channel (or frequency) and operating status at a glance. A new green LCD is easy to see in sunlight, but not too bright for night operations.

Powerful output extends your communications reach

The powerful 150 W* (PEP) transmitter provides long distance communication you can rely on. To make sure that power is always available to you-even during demanding RTTY (radio teletype) or E-mail operation-a large cooling fan combined with the IC-M700PRO's aluminum chassis keep the radio cool.

* 60 W (PEP) above the 24 MHz bands.

Scanning functions

Locate desired signals guickly with a powerful memory scan feature.

And more...

- Automatic antenna tuner, the AT-140, is available to match the transceiver to your antenna
- Numerous operating modes* available: USB, AM, CW, FSK and AFSK

*Ask you dealer for details.

- Wide band, general coverage receive-0.5 to 29.9999 MHz
- · Channel/frequency knob allows the user to tune specific frequencies around the memory channel
- NMEA plus 2 DIN connectors are available for external equipment connection, such as a linear amplifier, FSK terminal, E-mail modem. etc.
- NMEA0183 interface included

IC-M700PRO

SPECIFICATIONS

	GENERAL		TRANSMITTER

OPTIONS Some options may not be available in some countries. Please ask your dealer for details.

AT-130 is also available.

Provide better CW/RTTY reception. Bandwidth: 500 Hz/–6 dB MN-100 ANTENNA MATCHER

Matches the transceiver to a dipole antenna. Covers all HF bands from 1.5 to 30 MHz. 8 m × 2 antenna wires come attached.

Dynamic microphone. Same as supplied.

MN-100L ANTENNA MATCHER

Spare fuses

Match the transceiver to a long wire antenna. Covers all HF bands from 1.5 to 30 MHz. 15 m \times 1 antenna wire comes attached.

OPC-566

SHIELDED CONTROL CABLE 10m (32.8ft) shielded control cable connects between AT-140 (or AT-130) and transceiver.

Covers from 1.9 to 30 MHz band. Has an SO-239 connector. Easy to assemble (non-kink construction).
